

## DEEPWATER RELEASE

New downrigger for deep trolling. The line is released only if a fish grabs the bait, regardless of depth or speed.

### Inserting The Fishing Line

Insert line in between rubber pads

Fit the line through the lower notch of the lever

Push the lever into the casing

Weight  
5 - 10 Kg

Deepwater Release - Intelligent Downrigger line release

### Sensitivity Adjusting

Adjust sensitivity with slider according to size and drag of lure being used.

### Opening The Release

Open Release with thumb by pushing the slider to the upper position (See fig.) then turn holding plates towards direction shown by the arrow.

Warranty: This product has a five-year warranty. In the meantime, a defective product is replaced with a new one. If you are not satisfied with the product, send it back, and we will return the money.

# Expert Valuation

## Intelligent downrigger line releases only when a fish strikes.

The fundamental operating principle behind DEEPWATER RELEASE is dividing the hydrodynamic resistance of the fishing line into two components:

A - Hydrodynamic resistance of the vertical line (From the rod to the release clip).

B - Hydrodynamic resistance of the line with the bait on it. In both cases, the hydrodynamic resistance of the line changes exponentially with speed, proportionally with depth.

The vector A is some ten times greater than the vector B and because of this even a tiny change in speed or depth causes the classical release to set off the line. This problem is now successfully solved by DEEPWATER RELEASE.

### TECHNICAL DATA

Market name: DEEPWATER RELEASE. Short - ( D.R.)

Patent name: DEVICE FOR HOLDING A FISHING LINE

The recommendable thickness of the fishing line is from 0,4 - 0,8 mm.

Recommendable thickness line from downrigger is from 1,2 - 1,5 mm.

The heaviest weight is 15 kg.

The maximum straining force is 30 kg. (D.W.wire)

Wire = Saltwater inox (18-10)

Casing = Hostaform C 9021-(Polyacetal)

D.R. is not meant to be for BIG-GAME or as an outrigger.

D.R. configuration (1 downrigger +1 weight +1 release clip +1 lure)

D.R. is a particular release clip designed for fishing small fish and squid in extra deepwater.

Package: 18, 42, 60, 480 pieces

SMALL PACKAGE = 60 pieces (Pasteboard box approximately 2,5kg)

BIG PACKAGE = 480 pieces (Pasteboard box approximately 20kg)

Warning: Some fishing tackle manufacturer from the middle east and Taiwan are manufacturing and advertising on the market false Deepwater Releases. This copy looks very similar, but they work badly. You can find original Deepwater Release just at this address.
